Inauguration of the exhibition

From March 30 until April 26 2023, Rifugio Digitale, in collaboration with Forma Edizioni and thanks to the support of Banca Ifigest, will present the fourth exhibition of the photographic cycle SuperNatural, curated by Irene Alison and Paolo Cagnacci: Canicola by photographer Piero Percoco. The artists himself and the curators will be present at the inauguration on March 30 2023, at 6:30 p.m.

The exhibition *Canicola* by Piero Percoco, curated by Irene Alison and Paolo Cagnacci, is the fourth exhibition of the series dedicated by Rifugio Digitale to contemporary photography. Born in Puglia in 1987, Percoco debuted on the international photographic scene through his Instagram account @therainbow.is. underestimated, the channel through which he continues to pursue his personal study. In his pictures, the concept of SuperNatural – the theme that runs through the exhibition cycle created by Irene Alison for the Rifugio Digitale – acquires the generous and carnal form of a physicality that bursts its seams, shows its age, yells and sweats, filling the entire frame and disregarding every rule or judgment.

Between the Coney Island of Weegee, the suburban America of Stephen Shore and the southern liturgies of William Eggleston, Piero Percoco's Puglia loses its geographical borders to become a place of the soul, a place that, for the photographer, is at the same time "home" and unexplored territory. Writing in his visual language through video and photography, Percoco constructs a world of lazy Sundays, of bellies and butts, of pasta and sauce and clothes hung out to dry, of ripe figs that appear like alien creatures with their disturbing sensuality, from whose bodies fruits and colors overflow, without filters or half measures, in all their brutal, lush naturalness.

It will be possible to purchase the NFT(s) of selected videos from the artist on the knownorigin.io/refuge-digital website and the physical artwork on the website of Forma Edizioni www.formaedizioni.it.

RIFUGIO DIGITALE

Banca Ifigest

In the Middle Ages, the two largest banks in Europe already existed in Florence, the Bardi bank and that of the Peruzzi family, with branches all over Europe, lending money to merchants and monarchs. In the early 20th century, for the great bankers of New York, Florence was the icon of the maximum splendor they wanted to imitate and, indeed, when the building that houses the Federal Reserve was constructed, its architects were inspired by Palazzo Vecchio, Palazzo Pitti and, above all, Palazzo Strozzi, to give the structure an idea of stability, solidity and security. So it was in Florence, thanks to the initiative of several groups of entrepreneurs and historic Italian families, that Banca Ifigest was founded, in 1987.

Banca Ifigest, one of the main Italian independent banks is still today the most trusted partner for the management and conservation of family wealth, thanks to its personal approach. Today the bank operates branches in Rome, Turin, Genoa, Milan, Prato and Santa Croce sull'Arno, in addition to its main headquarters in Florence, it also has offices of Financial Consultants in Sesto Fiorentino and Casalecchio di Reno.

Among the numerous services provided by the banking group, Banca Ifigest offers services of assistance to those clients who need to preserve and safeguard complex equity situations, through its subsidiary Sevia Fiduciaria; it operates in the market of common investment funds, with its highly experienced management team, through its equity investment Soprano SGR and through Fundstore.it, the largest supermarket of online funds, where it is possible to purchase in as many as 7,000 different sectors using your own current account with any Italian bank.

Throughout its history, Banca Ifigest has always paid close attention to social considerations, working alongside small enterprises to ensure that their money is always used for the purpose for which it was intended. The Bank has often contributed to sponsor and realize cultural and sports events, demonstrating its strong ties to the local community.

INFOTO

The cultural association **INFOTO**-Florence was founded in 2019.

Its founding partners, photographers who are all Florentine by birth or adoption, number eighteen at the moment, but it is an open number: one of the primary goals of the Association is the promotion of initiatives and projects targeted on increasingly broadened participation.

In addition to organizing exhibitions, and the constant participation of many of our members in nationwide competitions, we are particularly focused on training, encouraging didactic activities guided by professional photographers. The main goal of INFOTO is to create a reference in Florence for photographic culture, which has been neglected for far too long. Attention to visual culture in its broadest sense, tends to make us more appreciative of other artistic disciplines as well, with a better understanding of painting, sculpture, architecture and the urban structure of our cities. Our members have participated regularly in exhibitions where their photography was featured alongside works of painting and sculpture, in search of the similarities and shared difficulties: a broader outlook from which to draw inspiration and new stimuli.

At this time, with the support of **Banca Ifigest**, we plan to organize a series of workshops alongside the important exhibitions presented at **Rifugio Digitale**. The workshops will be held by Italian and international photographers. Working alongside the professional journalist and photo-consultant, Irene Alison, and the photographer Paolo Cagnacci, who participated with us in organizing the exhibitions and workshops, we gleaned a number of interesting ideas for our activity in the field of quality photographic research.

RIFUGIO DIGITALE

Rifugio Digitale

Rifugio Digitale (Digital Refuge) is a new exhibition space in a former bomb shelter tunnel repurposed as a site devoted to the promotion of digital art, where architecture, design, photography, cinema, literature and all the other multiple forms of art and visual expression find their dimension and interact with one another. It was built on the foundations of an old anti-aircraft tunnel that served from 1943 as a bomb shelter in World War II. It was known as the *Forge Refuge* a safe haven during the tragedy of the war, and now it has been rechristened as the *Digital Refuge*, a place of rebirth, where technology meets art, offering a contemporary space where people can explore creativity through the modern language of technology.

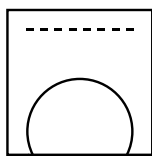

The requalification project, handled by *Archea Associati*, will house digital expressions of every kind, with an eye always on the future and on the new vanguards. In collaboration with the publisher **Forma Edizioni**, it will house exhibitions, but also events and performances related to art, architecture, photography, literature, cinema and other initiatives linked to the digital world. It will show original views and more on the 16 screens positioned along the 33 meters of the tunnel, a new idea for Florence where the connection between art, people and technology generates an intense visual experience, unexpected and interactive. It is a space designed for constant change, always dynamic, with a new and exciting speed that distinguishes it from a traditional art gallery.

Rifugio Digitale occupies an area of 165 square meters and is a versatile structure ideal for organizing exhibitions, events, presentation, but also debates, lectures and simple discussions. It is expected to appeal to a vast public desirous of indulging their interest in ideas and novel cultural experiences right in the heart of Florence.
